Aviary Systems - Voletage VIVO

Welfare friendly multi tier laying systems

Layout

- Integrated aviary and nest rows
- Corridors between living rows
- Nest row on top of the corridors
- Additional living space on top of the nest rows
- Independent operating feed lines on the top floor and lower floors make birds pass nest and water
- With multiple width of living rows and corridors, the system can be optimized to the width of a poultry house
- Optimized to keep the maximum number of birds per m2 ground space

Operation

- Comfortable wide corridors allow to walk and control throughout the aviary system
- Nest control by walking on the raised floor between the integrated nest rows
- Equal number of eggs on egg belt as all nest rows are on the same level
- Possibility to close the ground space under the system (initially)
- Easy to catch birds
- Comfortable wide corridors allow to walk and control throughout the aviary system
- Removal of manure with a bobcat is possible

Birds

- Birds move naturally inside the system
- Tree-structure of various floors
- Maximum jump distance for birds is 65cm
- Natural behaviour result in healthy birds with good performance

System

- Slatted floors from wire or plastic
- Chain feeding or pan feeding

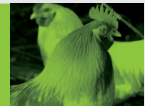

- Water lines with nipples or cups
- Various floor widths
- Various nest widths (depth)
- Very solid and robust system
- Optional manure drying

Compliance

- Designed within the EU guidelines
- 100% compliant with KAT

Width corridor	Width top floor
1,32m	1,44m
1,77m	1,98m
