Collinson 

Bulk Feed Silos

High quality feed storage solutions

Collinson County Silos

From standard specification, through to our recommended full feature models

The County Range now offers you complete control over the specification of your silo - by selecting from a range of options you can 'build' a top quality Collinson silo to meet your needs and your budget.

Centre discharge silos can fill bags, barrows or auger conveyor systems. With a telescopic chute, they can also fill tractor boxes, front end loaders and ATV trailers. High speed outloading augers can be used to fill wagons or trailers from high capacity silos.

Quality

Structural design to Eurocode 1, Part 1 to 4: to withstand wind speeds up to 26m/s at 250m above sea level.
Quality audit BS EN ISO 9001

All Collinson County Silos include:

- Smooth galvanised steel body
- Galvanised steel support structure
- Galvanised steel filler pipe, lockable, with 5mm wall top swept bend
- SafetyClean panel in lower cone
- Roof ventilator & vermin guard
- 3 Feed level indicators
- Crane lifting points
- Earth bonding points
- Operational, Health & Safety Instructions

Silo models:

- Capacities 4 to 50 tonnes
- Diameters 2.06m / 2.57m / 2.87m / 3.35m
- Centre discharge cone, 60° angle for pellets, nuts or wholegrain, 67° for meal or blends
- Unique true side discharge, 90°/50° cone angle
- Each support structure is manufactured to give the clearance required below the discharge selected
